Ocean Freight

We at Oog Project handle all types of cargo by Sea

1. NVOCC : With own fleet of general containers.

We are recognized as one of the most reliable and competitive international non vessel operating common carriers. With our own fleet of containers varying from 20' HD/40'HC/45'OT/FR/Reefers we offer the customer as per their requirement. Currently we are serving below sectors with regular sailing.

India, Srilanka, Malaysia, Singapore, Indonesia, Thailand, China, Myanmar, Pakistan, Maldives, Bangladesh, Gulf, CIF and are gearing up our capacities for the rest of the world.

2. FCL - FREIGHT FORWARDING

With good rapport and service contract with the Main Line carriers we offer our customers the best Freight rate coupled with entire Logistics support there by making it easy for the customer. We serve all major ports and interior destination where we don't serve with our own containers.

Freight Forwarding Services to : Africa , Asia-Pacific , Caribbean , Eurasia, Mexico and Central America Region, Europe

3. LCL

LCL is an acronym for "Less than Container Load". We serve the trade DOOR to DOOR there by reducing the cost & time with effective co-ordination right from their factory to end user.

Air Freight

When you need a cargo in urgent basis may be due to emergency requirement of the cargo, Perishable nature of the cargo (or) Economy reason whatever the reason is any size or any type, all cargoes can be handled by our AIR FREIGHT division.

We can offer door-door service by clubbing our AIR FREIGHT division to the land & overseas division to offer the customer complete logistics solution. We also charter cargo flight for specific project needs and also arrange suitable packing, choking, lashing wherever required.

COURIER:

We at Six Sigma offer the customers both domestic and international courier by all mode of transport.

Supply Chain Solutions

We specialize in total integrated Supply Chain solutions to wide variety of Industry clients with a vast experience in real-world logistics and supply chain for over 2 decades in automotive and electronics industries.

Demand for Supply Chain Solutions (SCS) is on the rise; companies know the cost and time savings available through closer analysis of their processes for moving products.

Six Sigma SCS team has one aim: to build better supply chains. It deploys tailored solutions that are easily implemented and set new standards for supply chain efficiency.

Analyze and improve: Every supply chain is unique. Six Sigma's work starts with a thorough assessment of a customer's corporate information, financial data and shipment profiles. We then analyze pain points, benchmark against industry peers and identify key areas for improvement.

Design and simulate: Six Sigma designs individual supply chain solutions that answer a single customer's needs. Each solution is simulated and its improvement potential is measured to provide clear strategic guidance on the best possible course of action.

Execute and continually improve: Once a strategic decision is made, the plan is put into practice. But the work does not stop there. Constant monitoring and regular reporting keeps a watchful eye on end-to-end supply chains to sharpen processes and continually improve operations.

Oog Project Cargo

Project Forwarding and Out of Gauge Transportation

Project Cargo

At OOG we handle any type of complex cargo be it OOG / Overweight to be loaded in Flat racks / Break bulk vessel etc. Though the handling requires multiple responsibilities we as team fulfill every aspect in a systematic way so that the cargoes of this nature is handled with safe and ease. Project cargo is a specialized field of freight forwarding that requires immense expertise, experience and knowledge. OOG is considered as one of the leading project logistics companies.

We offer our customers complete package in dealing with project cargo transport be it local or international. Project cargo can also encompass ocean freight, air freight, road and rail from site to installation. This requires managing a huge array of different infrastructures which we have efficiently handled in the past as well.

We own special containers like Flat racks, Flatbeds, Reefers, Open Tops, Hard Tops, 45' containers and ventilated containers for project exports. We have space availability with all major vessel operators. We handle any challenge presented to us. We offer Break Bulk/RORO service for cargoes which are volume based, heavy awkward dimensions where flat rack option is either not possible or expensive. As a member in major project networks we offer competitive rates for Break Bulk / RORO handling.

Extended Service

- Site survey / Feasibility studies (Routes, Weather, Political climate)
- Multi-modal transport (Rail, tug & barge, Heavy lift)
- Special equipment transport (Flatracks, Open top)
- Freight negotiation
- Administrative support (Customs clearance, Trade documentation)
- Tracking and tracing

Cargo Chocking

Cargo Chocking is done with heavy wooden blocks, logs of different size and weight, to give support to the base of the goods. We also offer flexi tank packing service.

Custom Clearance

In the world of customs, tariffs are complex and its difficult for the importers to understand the rules & regulation, benefits, waivers etc. We at SIX SIGMA with an experienced team guide the customer to get the right benefit & explains them the Dos & Dont's for them to be aware of the Customs act.

IMPORT & EXPORT CLEARANCE:

We at Oog take the responsibility of statutory documentation for of all types of Import & Export cargo be it LCL or FCL.

ATA CARTNET:

At Oog we specialize in ATA CARTNET (i.e) temporary import-export. This will suit the customers importing/exporting machineries / cargoes which will be re-exported back .We guide the customer and explain them the documentation procedures before start of the shipment so that they can enjoy the benefit of ATA CARTNET without any hurdle.

Our customs experts can guide you to release your consignments within free time sanctioned by the steamer agents. We use our expert skills and innovative techniques to meet the expectation of our clients as well meet the statutory regulations from time to time.

The following are the various facets of our services:

- Shipment consultancy
- Online paper though EDI
- Export and import customs clearing
- Documentation
- Shipment formalities
- Communication with customs authorities
- Inspection

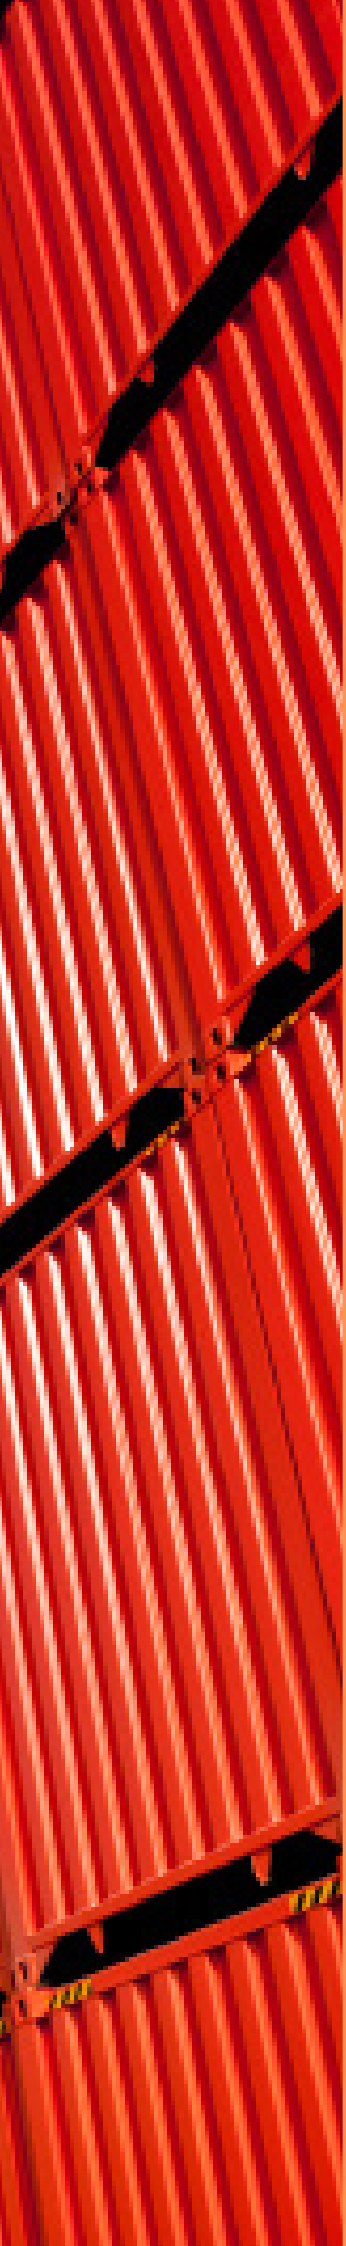

We have immense expertise in handling imports and exports through customs stations for Singapore, Malaysia, Colombo, Jabelali, China, France & USA

INSURANCE:

We take every step to ensure safe handling and transportation of your goods. Still, we recommend you to insure your goods against unforeseeable incidents. Make the right choice and eliminate all doubts.

We assure our clients:

- Timely execution
- Customer centric approach
- Container track system with CONCOR
- High flexibility
- Door to door service
- Container trailer track system

Speciality Logistics

Lashing & Cargo Chocking: With an experienced team with all latest lashing materials we serve the trade with professional lashing/choking solution. Be it general containers/Flatracks/Open Top or On Board break bulk shipments we use standard Lashing materials and lash under the supervision of reputed Surveyors. Our Agents in transshipment port also ensure the lashing is tight and fit for the vessel there by avoid any last minute issue while loading.
